Summary of Experience

Systems Administrator

Brandt Information Services, Inc., Tallahassee, FL
Created new accounts in Exchange 2010, Active Directory on Windows Server 2008 R2, Sharepoint 2010 and MS Lync 2010. Modified backups done in DPM and verified restores. Installed and configured Barracuda Cudatel VoIP Server and softphone clients. Configured Firebox Watchguard Firewall X750 eCore. Set up greengoodsandservices.org website. Set up wireless AP for client use, isolating the internal network. Documented the network, including all websites on all webservers and SSL certificates/domain name registrations.

Technical Support Analyst, Intranet Webmaster

WFSU-TV/FM, Florida State University, Tallahassee, FL
Conducted daily backups using Windows NT Backup. Performed test restores every two weeks. Maintained our Active Directory service for our users, creating and modifying users and groups. Monitored and maintained Internet and E-mail connectivity. Streamed three radio stations in Real media and MP3 formats. Streamed the Florida Channel, House and Senate 24/7 as well as The Florida Supreme Court Oral Arguments and the Public Service Commission Agenda meetings as needed. Assisted the Web Mistress with the Web site. Resolved issues with software and hardware for approximately 100 users as needed. Created and maintained the Intranet site, including writing web apps in PHP/MySQL for the Technical Issues and for IP addresses/Inventory. Created a Joomla Intranet site for FM, as well as a PHP/MySQL web app for the FM Library and an Access/SQL Server application for the Florida Channel. Created a PHP/MySQL web app for The Kirk Collection Gallery. Moved the Web Dev MySQL server from Windows Server 2003 to Windows Server 2008. Moved the FM FTP server/ Streaming server/ Intranet server from Windows Server 2003 to Windows Server 2008. Recreated the FM FTP site using IIS7 and recreated three intranet sites in IIS 7. Configured Windows Server 2008 firewall for all services needed.

Training Manager, Technical Trainer

Computer Tutors, Tallahassee, FL
Instructed over 700 happy clients in the proper use of a wide variety of Networking and Desktop Operating Systems, Office Productivity and Graphic Design software, in both a lab classroom environment and at the clients' location. Developed a Custom Outlook Level 1 class. Designed a Yellow Pages Ad for the Talking Phone book, as well as recreating the company logos in vector format for our Ad Specialty vendor. Supplied the music for a television commercial. Consulted for a variety of clients for topics ranging from graphic design to audio production packages to video editing.

Redesigned company website twice, to ensure accuracy between online class agendas and faxed/mailed class agendas, in addition to making it Section 508 compliant. Designed a webmaster certification track, graduating five people (two of which achieved CIW Certified Master Website Manager status). Designed a webserver administration course, incorporating both IIS and Apache on Windows and Linux server systems. Edited the HTML courseware to update it to modern standards.
